

Adriano Emanuele Califano

Software Developer - Cloud Engineer

Nationality: Italian **Date of birth:** 22 Jan 2002 **Place of birth:** Salerno, Italy **Gender:** Male

Phone: (+39) 392-753-2248 **Email:** califanoadriano22@gmail.com

LinkedIn: <https://www.linkedin.com/in/adriano-califano/>

GitHub: <https://github.com/adriano22jr>

Portfolio Website: <https://adriano22jr.github.io/portfolio-website/>

WORK EXPERIENCE

Software Developer - *ITSvil srl*

[November 17, 2025 – Ongoing] - Salerno (Italy)

Hands-on experience building and deploying end-to-end systems and microservices using **Java Spring Boot**, **React**, and **Node.js**. Actively involved in the deployment lifecycle, utilizing **CI/CD pipelines** with Jenkins and managing container orchestration with **Docker** and **Kubernetes**.

Erasmus Traineeship+ - *Jheronimus Academy of Data Science*

[March 1, 2025 – May 31, 2025] - 's-Hertogenbosch (Netherlands)

Erasmus project carried out as an extracurricular activity for the completion of the master's thesis project.

EDUCATION AND TRAINING

Master's Degree in Computer Science - *Università degli Studi di Salerno*

[October 26, 2023 – March 26, 2026] - Salerno (Italy)

Field of study: Computer Science - **Cloud Computing**

Final grade: 110/110 Cum Laude | **Level in EQF:** EQF level 7 | **Number of credits:** 126/120 CFU

Thesis: Serverless CRATOR: A serverless crawler for dark-web.

Weighted Average of exams: 28.929 | **GPA:** 4.0

Bachelor's Degree in Computer Science - *Università degli Studi di Salerno*

[September 1, 2020 – October 26, 2023] - Salerno (Italy)

Field of study: Computer Science

Final grade: 110/110 Cum Laude | **Level in EQF:** EQF level 6 | **Number of credits:** 180/180 CFU

Thesis: Application of NLP and QNLP techniques for classification of security requirements.

Weighted Average of exams: 28.321 | **GPA:** 4.0

TechCamp@POLIMI (Coding Course) - *Politecnico di Milano*

[June 2019] - Milano (Italy)

Completed an intensive, hands-on summer program focused on Python programming, exploring concepts such as software development and applied software engineering best practices.

B2 English Course - *Manhattan College*

[July 2022 – August 2022] - New York (United States)

LANGUAGE SKILLS

Mother tongue(s): Italian

Other language(s): English | English Language Certificate FCE with overall score of 168 (B2 level)

Listening B2 - **Reading** B2 - **Writing** B2 **Spoken Production** B2 - **Spoken Interaction** B2

SKILLS

Soft Skills

- Team Collaboration - Deadline Compliance - Organizational Planning - Time Management
- Adaptability - Fast Learning - Strategic Planning

Digital Skills

- High Performance Computing (HPC):** SYCL, C++, CMake, Parallel Programming, Linux/Shell Scripting.
- Programming Languages:** Java, Python, C, TypeScript, Node.js, JavaScript.
- Front-end & Mobile:** React, React Native (iOS/Android), HTML5, CSS3, Tailwind-CSS.
- Back-end & API:** Django, Flask, GraphQL, RESTful APIs, Java Spring.
- DevOps & Infrastructure:** CI/CD Pipelines (Jenkins, Azure, GitHub, GitLab), Docker, Kubernetes, Git (Advanced Version Control), Design and Develop of Cloud Architectures.
- Databases & Data:** SQL, NoSQL, Data Analysis, Data Compression.
- Data Science & AI:** PyTorch, Pandas, Matplotlib, Scikit-learn, Keras, TensorFlow. Experience in developing AI solutions both in cloud environments and in academic projects.

MAIN PROJECTS

Serverless CRATOR: A serverless crawler for dark-web [March 2025 – March 2026]

Design, development and deployment of a serverless crawler on Microsoft Azure cloud platform, designed to extract and process data from dark web pages.

Link: <https://github.com/adriano22jr/crator-web>

SYCL-Bench (DPCTL Integration) [November 2025 – January 2026]

Integration and testing of DPCTL Python library on SYCL Benchmark Suite.

Link: <https://github.com/adriano22jr/sycl-bench>

Light-Field Image Compression [November 2024 – February 2025]

Comparative analysis between traditional data compression techniques with Principal Component Analysis, Singular Value Decomposition and CNNs applied in the context of LightField Images.

Link: <https://github.com/adriano22jr/light-field-compression>

MedGraph [June 2024 – July 2024]

Project aimed at applying knowledge graphs in the domain of biomedical papers leveraging Named Entity Recognition (NER) technologies to identify and classify entities mentioned in the abstracts of biomedical papers.

Link: <https://github.com/adriano22jr/MedGraph>

Notepad-AI [February 2024 – March 2024]

Design and development of an online note-taking cloud platform, entirely based on Microsoft Azure infrastructure.

Link: <https://github.com/adriano22jr/Notepad-AI>

Graph pagerank analysis [December 2023 – January 2024]

Design and development of a tool for building knowledge graphs based on citations between papers, with PageRank analysis.

Link: <https://github.com/adriano22jr/graph-pagerank-analysis>

Classical-Quantum NLP [March 2023 – September 2023]

Development of classical and quantum binary classification models for non-functional requirements with Lambeq python library.

Link: <https://github.com/adriano22jr/Tesi-Quantum-NLP.git>
